Don,

Attached is the final 2000 diversion data for the Idaho Central Division diversions. Bill thought that I had sent this to you already and I thought he had sent it to you after he completed his review. I apologize for the confusion and delay this caused. Bill informs me that sending the data in an Excel spreadsheet file format is acceptable. If you need it in a different format, please let me know.

Tim Luke

Subject: 2000 Idaho Central Division Data

Tim:

As you know, it has been a long process getting the 2000 data all together, but I think that we are close. We are anxious to turn our attention to the 2001 data, but would like to wrap up the 2000 data first. As you know, we were slow in getting the Wy data in and out to you and so haven't felt that we could put much pressure on you to make your final review and update of the Idaho data. However, Jack or I are going to be in the field with Pete and the Wyoming Commissioners in the next several weeks in preparation of an early August combined tour of the Idaho and Utah water boards where they want us to explain distribution issues in the Central Division. Hence, Jack is now pressing me to get all of this wrapped up and behind us and get us moving on the 2001 data. To this end I am requesting that you forward to me the Central Division spreadsheet I sent you with Idaho's data corrected as soon as possible. If you have questions or concerns, please call Jack or me.

Thanks
